

APEXLOGIX SOLUTIONS: FINANCIAL AUDIT REPORT FY2025

1. Executive Summary

ApexLogix Solutions underwent a comprehensive financial review of its operations for the fiscal year ending December 31, 2025. The objective was to verify the accuracy of software licensing subscriptions and hardware product inventories, ensuring correct revenue recognition in accordance with IFRS 15 guidelines. The audit was conducted by Capital Assurance LLC.

2. Key Audit Findings

The financial controls at ApexLogix Solutions were found to be generally robust. However, the audit identified three specific areas requiring structural remediation in internal workflows:

Finding ID	Audit Area	Description	Status
AUD-01	Hardware Revenue Recognition Timing	Incorrectly recognizing revenue upon shipment rather than customer receipt.	Resolved
AUD-02	LiDAR Sensor Valuation Verification	Discrepancy in unit pricing methodology of RL-101 LiDAR sensor models.	In Progress
AUD-03	Sales Rep Commision Accruals	Delays in tracking commission payables in the CRM ledger system.	Pending Review

3. Revenue Recognition Policies

ApexLogix recognizes revenue across three segments: software licenses, hardware sales, and professional consulting. Software licensing is recognized monthly over the duration of the multi-year customer subscription. Robotics hardware sales are recognized when ownership transfers (FOB Destination), requiring verified delivery confirmation.
