

OPERATIONS REVIEW Q3 2025

Fulfillment Operations and Robot Fleet Performance

Operations Performance Overview

- Fleet utilization exceeded 94% across all customer sites during Q3.
- Total items picked grew by 42% YoY due to path planning updates.
- Supplier lead time remains a bottleneck for brushless motors (RL-202) at 30 days.
- Safety incidents: 0 reportable safety events across all deployments.

Logistics Pick Rate Optimization

- West Coast Port (LA) fleet reached a record peak of 70 picks/hour in Dec.
- East Coast Hub (NY) showed consistent gains after introducing pathing SOPs.
- Midwest Logistics (CHI) remains stable but requires lidar sensor recalibration.
