

MINUTES OF ANNUAL GENERAL MEETING 2025

Document ID: MTG-AGM-2025

Owner: Kavita Rao (CLO)

Classification: Internal Restricted

Purchase requisitions exceeding ₹25,000,000 must undergo comprehensive cost-benefit analysis and receive Level-3 financial approval from the CFO and final sign-off from the CEO.

Moreover, vendor invoices are matched against the purchase order and warehouse receiving record (three-way matching) before payment release. Discrepancies exceeding 2% trigger holding and dispute investigation.

Moreover, vendor invoices are matched against the purchase order and warehouse receiving record (three-way matching) before payment release. Discrepancies exceeding 2% trigger holding and dispute investigation.

In this context, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Moreover, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Specifically, purchase requisitions exceeding ₹25,000,000 must undergo comprehensive cost-benefit analysis and receive Level-3 financial approval from the CFO and final sign-off from the CEO.

Additionally, vendor invoices are matched against the purchase order and warehouse receiving record (three-way matching) before payment release. Discrepancies exceeding 2% trigger holding and dispute investigation.

In this context, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Furthermore, vendor invoices are matched against the purchase order and warehouse receiving record (three-way matching) before payment release. Discrepancies exceeding 2% trigger holding and dispute investigation.

Moreover, vendor invoices are matched against the purchase order and warehouse receiving record (three-way matching) before payment release. Discrepancies exceeding 2% trigger holding and dispute investigation.

Furthermore, working capital optimization requires balanced management of cash, accounts receivable, and inventory levels. High safety stocks must be balanced against storage carrying costs and liquid cash flow needs.

Additionally, purchase requisitions exceeding ₹25,000,000 must undergo comprehensive cost-benefit analysis and receive Level-3 financial approval from the CFO and final sign-off from the CEO.

Moreover, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Additionally, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

In this context, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Consequently, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

In this context, capital expenditure (CapEx) involves acquisitions and upgrades of

physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Consequently, monthly financial closes must verify all accounts receivable, accounts payable, ledger entries, and bank reconciliations. Deviations from budgeted departmental allocations must be reported to the Board.

Furthermore, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.

Consequently, purchase requisitions exceeding ₹25,000,000 must undergo comprehensive cost-benefit analysis and receive Level-3 financial approval from the CFO and final sign-off from the CEO.

Consequently, monthly financial closes must verify all accounts receivable, accounts payable, ledger entries, and bank reconciliations. Deviations from budgeted departmental allocations must be reported to the Board.

Consequently, purchase requisitions exceeding ₹25,000,000 must undergo comprehensive cost-benefit analysis and receive Level-3 financial approval from the CFO and final sign-off from the CEO.

Consequently, vendor invoices are matched against the purchase order and warehouse receiving record (three-way matching) before payment release. Discrepancies exceeding 2% trigger holding and dispute investigation.

Specifically, purchase requisitions exceeding ₹25,000,000 must undergo comprehensive cost-benefit analysis and receive Level-3 financial approval from the CFO and final sign-off from the CEO.

Specifically, capital expenditure (CapEx) involves acquisitions and upgrades of physical assets, while operating expenditure (OpEx) covers daily transaction runs. Both require distinct approval streams based on delegated authority limits.
